

ESD web wall LP magazine 180, with reinforcement and hole for slot lock

The PCB holders can be assembled in vertical as well as horizontal position. The system is absolutely variable in width and can be mounted for all PCB sizes as required. For the various PCBs, 100, 180 and 300 mm high PCB holders are offered. With 32 guide grooves at 10 mm intervals, the PCB holders offer maximum packing density.

Safe guiding: The guide grooves are funnel-shaped at the beginning to ensure safe insertion of the PCBs. The glued-on positioning strips with yellow colour markings indicate the exact placement position and prevent PCBs from being inserted at an angle by hand.

- H x W x D = 180 / 163 x 359 x 20 mm
- ESD web wall for PCB magazines series 180
- incl. hole for slot lock
- with reinforcement
- Weight: 0,65 kg
