# Hygostar latex glove HIGH RISK blue M 28cm, powderfree

Latex gloves High Risk by Hygostar: The glove HIGH RISK consists of extra strong natural latex, which makes it extremely tear-resistant. Despite its thickness of 0.25 mm it has a very good fit and a very good sense of touch. The glove HIGH RISK has a rolled edge and a roughened surface, which makes it very secure to grip. This glove is chlorinated on the inside and outside. On the inside, this coating reduces the risk of allergies. On the outside, it increases chemical and mechanical resistance. The glove HIGH RISK guarantees a safe protection against fats, oils, solvents, chemicals and also mechanical risks. It is also alkali-resistant and therefore also suitable for dough pieces.

- Chemical protection glove, 28cm
- Latex, especially strong quality, powder-free
- extremely tear-resistant, with rolled edge
- secure grip due to roughened surface
- very good fit and best tactile sensation
- glove inside chlorinated to reduce the risk of allergies
- Chlorinated glove outside for increased mechanical and chemical resistance

- Dispenser box
- alkali-resistant - suitable for dough pieces
