

MAESTRO 3E/450 depanelling machine, manual operation, depanelling length 450 mm

The MAESTRO 3E separates both small and large PCBs. The support table and the tray are infinitely adjustable to the best working position. The distance between the linear blade and the tray can be adjusted so that the edge strips fall through and are sorted out.

- Separation principle Insertion side roller blade, solder side linear blade
- Cutting process by hand
- Cutting length up to 450 mm
- Material: FR4
- component height: placement side up to 34 mm, solder side up to 23 mm
- Width x height x depth: 350 x 455 x 700 mm
- Weight 22 kg
- Approvals CE, FCC Class A

item number	WL10810
model	MAESTRO 3E/450 "TI"
model line	MAESTRO 3E
manufacturer	CAB
manufacturer item number	8933945
scope of supply	Sliver separator Hexagonal wrench 2 mm Operating instructions DE/EN
order unit	1 piece
content unit	1 piece
ESD safe	no
