Hygostar TPE glove ALLFOOD THERMOSOFT, transparent, smooth, size M

TPE gloves Allfood Thermosoft from Hygostar: The Allfood Thermosoft is made of particularly skin-friendly TPE (thermoplastic elastomers). The material contains neither softeners (phthalates) nor silicones or latex. Therefore the disposable gloves made of TPE are very well tolerated. Another advantage: The glove is food-safe and unrestrictedly suitable for working with food - even with fatty or oily foods. Gloves made of TPE are therefore ideal for everyone who works with food. Thanks to their good skin compatibility, TPE gloves are also suitable for other hygiene-sensitive or cosmetic areas where gloves have to be worn very long and frequently.

Material Info: What is TPE? Thermoplastic elastomers are a new type of material with silicone-like qualities. The main raw material for the production of elastomers is natural or synthetic rubber, which is combined with the functionality of a plastic. This material is: odourless, contains no softeners (phthalates) and no silicone, has good elasticity as well as

strength and is UV-resistant.
• Disposable glove
• TPE (thermoplastic elastomers), powder-free, non-sterile
• cheap alternative to vinyl gloves
• excellent fit on hand and fingertips
• very soft and skin-friendly
• good tactile sensitivity
• especially suitable for touching fatty and oily foods
• Dispenser box

Item no.	**WL48938**
Model	Hygostar-263150
Model line	Hygostar Allfood
Manufacturer	FRANZ MENSCH
Manufacturer article no.	263150
GPSR manufacturer data	Franz Mensch GmbH Werner-von-Siemens-Straße 2 DE-86807 Buchloe www.franz-mensch.de
Sales unit	1 PU
Content unit	200 piece
Manufacturer colour information	transparent
Colour	transparent
Type of gloves	long finger gloves
Material of the gloves	vinyl
Glove size	M
Coating	without coating
Powder-free	yes
Nubs	no
ESD compliant	no
