

MAESTRO 3E/450 depanelling machine, manual operation, depanelling length 450 mm

The MAESTRO 3E separates both small and large PCBs. The support table and the tray are infinitely adjustable to the best working position. The distance between the linear blade and the tray can be adjusted so that the edge strips fall through and are sorted out.

- Separation principle Insertion side roller blade, solder side linear blade
- Cutting process by hand
- Cutting length up to 450 mm
- Material: FR4
- component height: placement side up to 34 mm, solder side up to 23 mm
- Width x height x depth: 350 x 455 x 700 mm
- Weight 22 kg
- Approvals CE, FCC Class A

Item no.	WL10810
Model	MAESTRO 3E/450 "TI"
Model line	MAESTRO 3E
Manufacturer	CAB
Manufacturer article no.	8933945
GPSR manufacturer data	CAB Produkttechnik Wilhelm-Schickard-Straße 14 DE-76131 Karlsruhe www.cabgmbh.com
Scope of delivery	Sliver separator Hexagonal wrench 2 mm Operating instructions DE/EN
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
ESD compliant	no
