ESD PCB magazine set 100

The PCB holders can be mounted in vertical as well as horizontal position. The system is absolutely variable in width and can be mounted for all PCB sizes as required. For the various PCBs, 100, 180 and 300 mm high PCB holders are offered. With 32 guide grooves at 10 mm intervals, the PCB holders offer maximum packing density.
Safe guiding: The guide grooves are funnel-shaped at the beginning to ensure safe insertion of the PCBs. The glued-on positioning strips with yellow colour markings indicate the exact placement position and prevent PCBs from being inserted at an angle by hand.

- e.g. for PCBs with 100 mm width
- Material: polypropylene
- Colour: black
- Surface resistance: according to DIN EN 613450-5-1 < 10^9
- Groove width: 2,8 mm
- Groove depth: 2.0 mm
- Number: 32
- PCB spacing: 10 mm
- Quick and easy assembly
- Stable and torsion-resistant
- Slot lock
- Stackable

• Upright standing
• Transport containers - for transport, the PCB magazines can be inserted into standardised containers 600x400 or 400x300 mm.

Item no.	**WL10818**
Model	Testset 100
Manufacturer	CAB
Manufacturer article no.	8910063
GPSR manufacturer data	CAB Produkttechnik Wilhelm-Schickard-Straße 14 DE-76131 Karlsruhe www.cabgmbh.com
Length	369 mm
Height	100 mm
Scope of delivery	4 web walls 100 2 profile rails length 369 mm 1 clamp
Sales unit	1 piece
Content unit	1 piece
Colour	black
Material	polypropylene
ESD compliant	yes
PCB magazine series	Series 100
PCB magazine material	plastic
