Thermometer without certificate

The Hakko FG-100B tip thermometer does everything the FG-100 did, and more. The new AUTO HOLD feature ends measurements automatically, once the tip temperature is stabilized - this can minimize individual differences in measurements. The FG100-B can also display in both Celsius and Fahrenheit.

To preserve battery life, the auto shutoff feature turns the thermometer off when not used for three minutes. The thermometer design allows for easy measurements from right or left handed operators.

The sensor has a special metal alloy coating that resists corrosion and oxidation. Note: the 191-212 sensor can measure temperatures up to 500°C (932°F). For higher temperatures, please use the applicable temperature probe (part number A 1310.)
• incl. sensors AS5000 incl. battery

Item no.	WL63609
Manufacturer	HAKKO
Manufacturer article no.	FG 100B-70
GPSR manufacturer data	TBK - Technisches Büro Kullik GmbH Industriestrasse 27 DE-56276 Großmaischeid www.kullik.com/
Length	140 mm
Width	75 mm
Height	44 mm
Sales unit	1 piece
Content unit	1 piece
Incl. battery	yes
Temperature range °C	0 – 700 °C
ESD compliant	no
