cartello di avvertimento, carta, tedesco, rotolo

The warning sign on paper roll from WARMBIER is the ideal solution for short-term or flexible labeling. Measuring 36 x 75 mm, it fits on many surfaces, is self-adhesive and can be easily used on unwinding stations thanks to the 40 mm core diameter.

The yellow color with black print ensures optimum visibility, while the German lettering clearly indicates dangers or instructions. The practical roll shape allows quick removal and application, ideal for industry, workshops, laboratories or shipping areas. The paper is ESD-compliant, meaning it can also be used safely in electrostatically sensitive areas.
