Sac de protection ESD DRY SHIELD, argent, 203 x 406 mm

The ESD DRY SHIELD shielding bag model 3711.DR.0816 from Warmbier is designed for the safe protection of electrostatically sensitive components. Measuring 203 x 406 mm, the silver-colored bag offers sufficient space for components of different sizes and ensures reliable shielding against electrostatic discharge.

The metallized film provides effective ESD protection, while the sturdy construction minimizes mechanical stress during storage and transport. The bag is not resealable, but impresses with its high level of protection and easy handling when packaging individual components or assemblies.

This shielding bag is ideal for applications in electronics production, assembly, repair and laboratories where sensitive components need to be protected from electrostatic damage.
