

## Cleaning sponge for SC-7000Z

---

The model 4 ST 801 cleaning sponge from DIC is designed as a suitable accessory for the SC-7000Z device stand and is used to effectively clean soldering tips. It supports the even removal of residues such as flux or solder and thus contributes to consistently good soldering results.

Thanks to its coordinated shape, the sponge can be easily inserted into the corresponding device stand and is immediately ready for use. Regular cleaning of the soldering tip helps to extend its service life and maintain heat transfer during soldering.

Item no.	WL11917
Model	4 ST 801
Manufacturer	DIC
Manufacturer article no.	4 ST 801
