

Spare heating element for ERSA 350 soldering iron

The replacement heating element model 351 from ERSA is designed for the ERSA 350 soldering iron and ensures a reliable and constant heat supply during soldering. With an output of 350W at 230V, it enables fast heat-up times and stable temperature control, ensuring precise and clean solder joints.

The heater is RoHS-compliant and therefore meets the requirements for environmentally friendly and low-emission components. The precision-fit design makes it easy to replace, extending the service life of the soldering iron and ensuring continuous operation.

This spare part is ideal for professional applications in electronics production, rework and repair, where reliable heat output and long-lasting functionality of the soldering iron are crucial.

Item no.	WL12076
Model	351
Manufacturer	ERSA
Manufacturer article no.	E035100
GPSR manufacturer data	ERSA GmbH Leonhard-Karl-Strasse 24 DE-97877 Wertheim
