

Digital temperature controller

- Temperature controller with digital display RA 4500 D
- With this temperature controller, the temperature in Ersa soldering baths can be kept at a constant level.
- A connecting cable with safety plug allows the mains connection and a cable with coupling allows the connection of the solder bath.
- The desired (target) temperature is set with a rotary knob.
- The actual (actual) temperature in the solder bath is monitored by a temperature sensor (thermocouple), is not included in the scope of delivery, which is immersed in the solder.
- A button on the front panel can be used to switch from the actual value display to the setpoint display.
- max. connected load: 3000 W
- max. control deviation: -0.02%

item number	WL12373
model	RA4500D
manufacturer	ERSA
manufacturer item number	ORA4500D
length with packaging	300 mm
width with packaging	140 mm

Products for the electronic industry

height with packaging	105 mm
order unit	1 piece
content unit	1 piece
RoHS conform	yes
supply voltage	230 V
temperature range °C	50 – 600 °C
