

Reading glass combi PLUS with case, aspherical, 3.5x, 10 dpt., D=75x50 mm

Behind the aspherical combi PLUS reading glass from Eschenbach is a hand magnifier with a swing-out handle, which can also be used as a stand magnifier thanks to the fold-out metal feet. These allow the magnifier to be tilted for a comfortable oblique view. The luminosity is adaptable.

- The practical all-round talent for individual use
- Aspherical PXM® light lens cera-tec® coated for sharp-edged, distortion-free imaging
- The lens comes in a black case made of finely textured leather with a velvety soft inner lining to protect the lens.
