

SMD adhesive 3609, 10 ccm

- high wet strength
- long stencil life
- for bonding surface-mounted components to the printed circuit board prior to wave soldering
- especially for applications where medium to high delivery speeds, high point profile, high wet strength and good electrical properties are required
- no mixing necessary
- can be used in lead-free wave soldering with water-based and alcohol-based fluxes

item number	WL13623
model	3609-10ML
manufacturer	LOCTITE
order unit	1 piece
content unit	1 piece
