

Extraction column DN50, width 200 mm, red

- Suction gap for concentrated sources of contamination
- For smaller, concentrated pollutant sources.
- Is positioned at the table, behind the source, so that the air stream can draw the pollutants away.
- Inner manifold for optimum extraction efficiency.
- Often used for soldering.

item number	WL15448
model	1-5020-4
manufacturer	ALSIDENT
manufacturer item number	1-5020-4
width	200 mm

order unit	1 piece
content unit	1 piece
colour	red
Colour	red
material	Tube and suction gap made of anodised aluminium - layer thickness 10µ - or impact-resistant, chemically resistant polypropylene
diameter of tube	50 mm
ESD safe	no
