

ESD suction tip DN50, length 210 mm, aluminium

Description

- Suction tip for concentrated sources of contamination
- High efficiency, as the suction tip can be positioned directly at the source without hindering the work process
- Elaborately processed cantilevers of the suction tip to increase the efficiency of collection

Product details

item number	WL15451
manufacturer	ALSIDENT
manufacturer item number	1-5021-6
model	1-5021-6
length	210 mm
order unit	piece
colour	black
material	Pipe made of chromated TCP aluminium to

Products for the electronic industry

	ensure permanent conductivity
diameter of tube	50 mm
device series	WSA-10LR, WSA-20LR, WSA-5LR
ESD safe	yes
