

Cleaning brush for FE suction tube

The cleaning brush for FE extraction pipes from Weller is an indispensable tool for the effective maintenance and cleaning of extraction systems. Specially developed for the thorough removal of deposits and contamination, this brush ensures optimum functionality and longevity of your extraction system. The robust design and high-quality materials ensure reliable performance and a long service life. Perfectly matched to the requirements of modern extraction systems, the cleaning brush helps to maintain a clean and efficient working environment.

D = 5 mm (for suction pipe D = 0.6 mm)

Item no.	WL16454
Model	T0052540999
Manufacturer	WELLER
Manufacturer article no.	T0052540999
