

IC assembly tool DIP-IC-28

The Weller IC placement tool DIP-IC-28 offers a precise and efficient solution for the placement of PCBs. Equipped with six infrared high-temperature radiators, it enables fast and effective heating. The heated area of 190 x 245 mm (9.65 x 7.48 inches) ensures even temperature distribution. Two Easy Fix PCB holders ensure stable fixing during the work process. The digital control electronics with display for set and actual temperature enables precise temperature control. The device is WX compatible and therefore offers seamless integration into existing systems.

Item no.	WL16796
Model	DIPIC28
Manufacturer	WELLER
Manufacturer article no.	T0054700799N
GPSR manufacturer data	WELLER Tools GmbH
