

## W 201, soldering iron for mains voltage MAGNASTAT, 200 W

The Weller Magnastat system operates through a ferro-magnetic sensing device which changes its characteristics when specific temperatures are reached. This causes it to either attract or repel a permanent magnet which operates a power supply switch. In this way power to the heating element can be quickly switched on or off to either provide extra power for soldering operations or reduce power when idling. Various pre-selected tip temperatures are available to permit different types of soldering to be undertaken. Working temperature selection is achieved by simply changing the "temperature sensing" soldering tip. These are available in temperature ratings of 260°C, 310°C, 370°C, 425°C and 480°C.

- Magnastat Series
- with soldering tip CT2-F7 and shelf angle

item number	WL17067
model	W 201
manufacturer	WELLER
manufacturer item number	T0056105699N
GPSR manufacturer information	WELLER Tools GmbH Carl-Benz-Strasse 2 DE-74354 Besigheim www.weller.eu
order unit	1 piece
content unit	1 piece
product series	Mains voltage soldering iron

Products for the electronic industry

power	200 W
voltage	230 V
handle type	soldering iron
type of tip	HM
temperature range °C	370 °C
temperature range °F	698 °F
suitable tips	CT2 (LT, PT)
included soldering tip	CT2 F7
suitable control unit	Netzbetrieb
ESD safe	yes
