

## Solder fume extraction unit, WFE P

---

- Up to 2 FE soldering irons can be connected
- Electric vacuum pump provides the necessary vacuum
- 2 power levels for optimum extraction with 2 FE pistons
- Portable unit for central use, with built-in pump. (Not suitable for 24 h continuous operation).
- The capacitor motor is maintenance-free and has an integrated temperature fuse to protect the unit from overload.
- The Weller WFE P extraction unit is designed for extraction on up to 2 FE soldering irons. An electric, durable and optimally sound-insulated vacuum pump provides the necessary vacuum, making the WFE P independent of compressed air. The vacuum pump has two power levels which can be adjusted by means of a toggle switch according to the number of FE soldering irons connected. This saves energy. The capacitor motor is maintenance-free and has an integrated temperature fuse which protects the unit against overload. Thanks to the filter lift system, the filter can be changed quickly and easily. The FE (Fume Extraction) soldering irons are connected directly to the unit, no further hose accessories

are required.

item number	WL17082
model	WFE P
manufacturer	WELLER
manufacturer item number	T0053638699N
length	140 mm
width	140 mm
height	295 mm
order unit	1 piece
content unit	1 piece
power	70 W
voltage	230 V
vacuum max	30000 Pa
noise level	45 dBA
air volume	50 l/min
