

## Micro desoldering tweezers for modular stations, PA120-A

The PA120 micro tweezers are the perfect solution for fast and precise SMD rework of chip components and small/medium SOP of PCB assemblies.

The tweezers are ergonomically shaped and the short distance between tip and handle ensures greater accuracy and comfort when working.

The PA120 micro tweezers can be used with DI, DDE and DME controllers using the AMS stand and can also work with the CP precision rework station.
