

## WSF 81D8, soldering station 80 W, with tin feeder

---

The WSF 81D soldering station has an automatic feed system for solder. The WSF 81D8 is suitable for solder wire diameters between 0.8 and 1.5 mm. Adjustment to the respective wire diameters is automatic. Two different operating modes are available: Automatic and permanent solder feed. It is possible to switch between the two modes at any time by setting the operating mode and the heating element accordingly. The supply unit includes the electronic feed control and temperature control. There is a tin roll holder in the feed unit, which is designed for a load capacity of up to 1 kg.

- Display: 3-digit digital display for actual and set value
  - Adjustable temperature range: Digital control electronics
  - Fuse: T800mA
- with automatic solder wire feeder (0.8-1.5 mm)
