

SMD desoldering head CSF-D

The CSF-D SMD desoldering head from Weller is a high-quality tool for precise and efficient desoldering of SMD components. With its robust design and precise temperature control, the CSF-D enables reliable handling even for demanding soldering work. The innovative technology ensures even heat distribution, which protects sensitive components. The CSF-D is compatible with various soldering stations and offers a long service life, making it a cost-effective solution for professional use.
