

## KW 3 Suspension tray with lid

---

---

For the application of chemically aggressive liquids (e.g. TICKOPUR J 80 U), the removal of chemically aggressive or abrasive soiling or the sonication of sample liquids, insert cups are used (indirect sonication). Because nothing may be placed on the bottom of the ultrasonic bath, BANDELIN offers suitable insert cups made of plastic with a lid. Please note that in order to transmit the ultrasound to the insert beaker, the surface tension of the water must be reduced and therefore a cleaning solution (e.g. TICKOPUR R 33 3%) must be used as coupling liquid / contact liquid.

Plastic insert vessel with lid

for stainless steel aggressive chemicals

□ for RK 100 H / RK 100 SH / RK 102 H / RK 103 H / DK 102 P / TK 100 / TK 100 H

□ inside: L x W x D = 195 x 115 x 88 mm

---

Products for the electronic industry

- temperature resistant: Water up to 80 °C / Acids up to 60 °C
- Polyethylene, unperforated
