

Suction tip DN50, length 210 mm / white

Description

- Suction tip for concentrated sources of contamination
- High efficiency, as the suction tip can be positioned directly at the source without hindering the work process
- cantilevers of the suction tip to increase the efficiency of collection

Product details

item number	WL20648
manufacturer	ALSIDENT
manufacturer item number	1-5022-5
model	1-5022-5
length	210 mm
order unit	piece
colour	whitely
material	Pipe made of anodised aluminium - layer

Products for the electronic industry

	thickness 10 μ , muzzle made of shock-resistant, chemically resistant polypropylene
diameter of tube	50 mm
