

ESD Transponder card for PGT 2000 ESD

The ESD transponder card model PGT2000.IDCARD from Warmbier is designed for use with the PGT 2000 system and is used for safe identification and control in ESD-protected working environments. The ESD-compliant design reliably dissipates electrostatic charges, protecting both the card itself and sensitive electronic components.

The transponder card is robustly manufactured and is suitable for professional use in production, laboratories or assembly areas where ESD protection of people and components is crucial. It enables efficient control and safe handling of ESD workstations and supports compliance with applicable protection guidelines.

Item no.	WL20873
Model	PGT2000.IDCARD
Manufacturer	WARMBIER
Manufacturer article no.	7100.PGT2000.IDCARD
GPSR manufacturer data	Wolfgang WARMBIER Untere Gießwiesen 21 DE-78247 Hilzingen www.warmbier.com

Sales unit	1 piece
