

## DE 514 Perforated lid for ultrasonic bath

When using chemically aggressive liquids (e.g. TICKOPUR J 80 U), removing chemically aggressive or abrasive contaminants or sonicating sample liquids, insert cups are used (indirect sonication). Because nothing may be placed on the bottom of the ultrasonic bath, BANDELIN offers suitable perforated lids/insert strips to hold the insert beakers. Further advantage: Several insert cups can be sonicated with different liquids at the same time (e.g. removal of dental cements with STAMMOPUR Z in one and cleaning with simultaneous chemical disinfection of dental instruments with STAMMOPUR DR 8 in a second insert cup).

- Stainless steel
- for hanging 4 insert cups.
- Suitable for RK 514/H/BH, DL 514 BH

item number	WL21941
model	DE514
manufacturer	BANDELIN
manufacturer item number	3039
length	356 mm
width	291 mm
