

Chisel shaped soldering tip, 1.8 x 0.8 mm, C245944

The JBC C245944 is a high-quality soldering tip from the C245 series, which is characterized by its versatility and exceptional durability. With a blade width of 1.8 mm and a thickness of 0.8 mm, this chisel tip is ideal for general soldering applications, both for through-hole and SMD components. It also meets the requirements of demanding applications, such as the soldering of ground planes.

Thanks to the innovative JBC technology, the C245944 tip offers instant heating, excellent heat transfer and exceptional durability. It lasts up to five times longer than conventional soldering tips, which is made possible by the efficient heating system and the sleep and hibernation functions. These features help to significantly extend the life of the tip while minimizing energy consumption.

The C245944 tip is compatible with the T245 soldering irons and is ideal for use in professional soldering stations.

Item no.

WL22059

Products for the electronic industry

Model	C245-944
Manufacturer	JBC
Manufacturer article no.	C245944
GPSR manufacturer data	JBC Soldering SL Ramón y Cajal 3 ES-08750 Molins De Rei www.jbctools.com
Length with packaging	110 mm
Width with packaging	12 mm
Height with packaging	12 mm
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
Product series	C245
Tip series	C245
Incl. integrated heating	yes
Tip dimensions	1,8 x 0,8 mm
Tip length	13.5 mm
Tip width	1.8 mm
Total length of the soldering tip	100 mm
Tip shape	chisel-shaped
Tip alignment	straight
Matching handpiece	T245
ESD compliant	no
