

Soldering iron for AL250-A, AL250-A / AL250-B

The AL250 auto-feed soldering iron is the most suitable tool for extensive soldering applications that require a free hand.

With a single push of a button, the tool automatically feeds the exact amount of solder programmed in the station. This feature makes it the perfect tool when a consistent amount of solder is required for repetitive solder joints.

It also has an anti-twist feature to keep the tip perfectly aligned.

The AL250 Auto-Feed soldering iron works exclusively with the AL Auto-Feed soldering station and the C250 cartridge series.

- supplied without soldering tip

item number	WL22618
model	AL250-A / AL250-B
manufacturer	JBC
manufacturer item number	AL250-B

Products for the electronic industry

length with packaging	300 mm
width with packaging	125 mm
height with packaging	65 mm
scope of supply	Soldering iron with guide tube
order unit	1 piece
content unit	1 piece
nominal power	50 W
voltage	24 V
handle type	soldering iron
suitable tips	c250
suitable control unit	AL
ESD safe	yes
wire diameter	0.4 – 1.8 mm
