Temperature measuring device with digital display
for measuring of different media - according to the respective measuring sensor use (NiCr-Ni/type K)

- min/max value memory, adjustable offset/scale
- measuring range °C = -65.0 to +1150 °C; ± 0.1 %
- measuring range °F = -85.0 to +1999 °F; ± 0.1 %
- H x W x D = 26 x 71 x 142 mm
- 9 V battery operation (battery included)
- compatible measuring sensor: WTMS-112 for soldering tip temperature
- WTMS-212 for surfaces and immersion

item number

WL23181

model

WTM-200D
