

## Weller soldering tips Grinding Stone

Weller's soldering tips, model Schleifstein and {{D}}, offer precise and reliable performance for demanding soldering work. These tips are specially designed to ensure optimum heat transfer, resulting in consistent and clean solder joints. The high-quality finish ensures a long service life and consistent results. Thanks to their compatibility with a wide range of soldering stations, they are versatile and support efficient workflows. Weller stands for quality and innovation, which is reflected in the functionality and durability of these soldering tips.

- Polishing stone for removing dense oxide layers from soldering tips
- Cleaning only possible in the cold state of the soldering tip

Item no.	WL23475
Model	WPB1
Manufacturer	WELLER
Manufacturer article no.	WPB1
