

Rework heating plate without control station

- Infinitely variable temperature controlled, compact and ergonomic infrared rework heating plate with integrated thermocouple including control station for preheating all SMD components, assemblies and substrates
- To support the hand soldering process especially in lead-free applications and to avoid temperature shocks during soldering.
- Also suitable for reflow soldering of single-sided boards, for reballing and drying pastes and adhesives
- Recommendation: to monitor the temperature of the modules, use the ERSA temperature measuring device in conjunction with the ERSA precision temperature probe.
- Spare part without control station ORA4500D

item number	WL23511
model	IRHP203

Products for the electronic industry

manufacturer	ERSA
manufacturer item number	0IRHP203
length with packaging	365 mm
width with packaging	320 mm
height with packaging	215 mm
order unit	1 piece
content unit	1 piece
RoHS conform	yes
digital display	yes
