

Dosing device Performus I, analog, without timer, 0-7 bar (0-100 psi)

The Performus I analog dispenser from Nordson EFD is ideal for applications where time-controlled dispensing is not required. It is versatile and particularly suitable for spot, bead and fill applications with different materials. The compact device is equipped with an electric foot switch and vacuum control, which effectively prevents dripping of low-viscosity materials. The dispenser is designed for user-controlled dispensing applications where only manual dispensing is possible and is supplied without accessories.

item number	WL23903
model	7012330
