

## ESD grounding point, 3 x 10 mm push button, yellow

The ESD grounding point is used to dissipate static charge and protect electronic devices and components. This consists of three push buttons, each of which has a discharge resistance of 1 megohm, and a 3 meter cable. The ESD grounding point has a yellow color. With the help of the three push buttons attached to a 3 meter cable, you can discharge static electricity from people or objects to prevent damage to electronic equipment and components. Each push button has a leakage resistance of 1 megohm, which improves the effectiveness of static electricity dissipation. The yellow color of the ESD grounding point can help identify and access it faster.

- for grounding of persons
- for mounting underneath the table top
- Connection: 3 x 10 mm push button
- Earthing cable: L = 3 m

item number	WL24948
model	SG-EP-3x10DK-GE
manufacturer	SAFEGUARD
manufacturer item number	SG-EP-3X10DK-GE
order unit	1 piece
content unit	1 piece
colour manufacturer	yellow
Colour	yellow
typical bleeder resistance	Pro Anschluss 1 MOhm Sicherheitswiderstand

connection	3x 10 mm press stud
length cable	3 m
ESD safe	yes
