

## Nano desoldering tweezers, NP105

The smallest JBC tweezers for the repair of very small components that require the highest precision, such as the 0402, 0201, 01005, etc. chips.

It works with two individually managed cartridges.

The NP105 nano desoldering tweezers enable stable movements thanks to a single-axis system. Ideal for very precise applications.

The screw guarantees vertical alignment of the cartridges. One tip is always in line with the other.

The short distance between tip and handle allows better manual control of the tool, even when using a microscope.

The concave shape of the handles ensures that the finger does not slip downwards.

Supplied without cartridges.

- Compatible with NASE and NANE Nano stations

<b>Item no.</b>	<b>WL25080</b>
Model	NP105
Manufacturer	JBC
Manufacturer article no.	NP105-A
GPSR manufacturer data	JBC Soldering SL Ramón y Cajal 3 ES-08750 Molins De Rei www.jbctools.com
Length with packaging	235 mm
Width with packaging	40 mm
Height with packaging	40 mm
Scope of delivery	Soldering Iron with 2 Finger Sleeves N1738

Products for the electronic industry

Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
Handpiece (type)	soldering tweezers
Matching tips	C105
Cable length	1.2 m
Matching control unit	NA-1C, NA-2C, NA-9C
ESD compliant	yes
