

Desoldering iron for MD 2964/2965 or DS-2A/DV-2A, DS360-A

The DS360 micro desoldering iron is used for precision desoldering work on SMD or conventional components.

It is capable of delivering up to 40 W.

The JBC Most Efficient Soldering System and the suction power of the MSE or MVE pumps ensure optimum quality of the work carried out.

DS360 is light and easy to clean and maintain. Both the disposable cardboard hose and the filter sets can be easily replaced.

It uses the C360 range of tips with internal diameters from 0.6 mm to 1.5 mm.
