

Light kit for MAGNUS +7/+10

The light kit model 108442 from TAGARNO is designed for use with MAGNUS systems in combination with Fresnel lenses in the range from +7 to +10. It provides coordinated illumination for applications where higher magnifications and precise light guidance are required.

The kit is optimized for a working height of 80 to 150 mm and supports uniform illumination of the working area within this distance. This allows details to be seen clearly and inspection or assembly work to be carried out efficiently.

Thanks to its custom-fit design, the light kit can be easily integrated into existing systems and is a useful addition to optical equipment when adapted lighting is required for specific working distances.

- for Fresnel lenses +7 to +10
- Working height 80 - 150 mm

Item no.	WL25894
Model	108442
Manufacturer	TAGARNO
Manufacturer article no.	108442
GPSR manufacturer data	TAGARNO AS Finlandsvej 2 DK-8700 Horsens www.tagarno.com
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
Working height	150 mm
ESD compliant	no
