

## Optical diffuser for MAGNUS

---

---

The optical diffuser model 108439 from TAGARNO is designed for MAGNUS lighting systems and is used for the uniform diffusion of light sources. It is used in particular when the diodes of a ring light produce a light that is too punctiform and sharp. The diffuser distributes the light more softly, reducing reflections and achieving more homogeneous illumination.

The filter is compatible with the WHITE LR60/110 ring light and can be easily integrated into the existing lighting system. This significantly improves the view of surfaces and details, which is particularly advantageous for inspection and testing tasks.

The optical diffuser is therefore a practical addition for applications where uniform, glare-free illumination is required.

- Compatible with: Item no. 108436: RING LIGHT WHITE LR60/110

<b>Item no.</b>	<b>WL25922</b>
Model	108439
Manufacturer	TAGARNO
Manufacturer article no.	108439
GPSR manufacturer data	TAGARNO AS Finlandsvej 2 DK-8700 Horsens www.tagarno.com
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
ESD compliant	no
