

ESD packaging bag PERMASTAT®, 400 x 600 x 0.1 mm, pink

The PERMASTAT® ESD packaging bag from Warmbier is designed for the safe transportation and storage of electrostatically sensitive components. With dimensions of 400 x 600 mm and a film thickness of 0.1 mm, the bag offers sufficient space for components of different sizes, while the permanently dissipative design reliably dissipates electrostatic charges.

The pink color makes it easier to visually distinguish ESD-safe packaging in the work area. Although the bag is not resealable, it impresses with its stable, durable film quality and provides mechanical protection against dust, scratches and light impacts.

The PERMASTAT® bag is ideal for professional applications in electronics manufacturing, repair and laboratories where ESD protection for components and assemblies is critical and safe, controlled handling is required.

Item no.	WL26169
Model	3110.400x600
Manufacturer	WARMBIER
Manufacturer article no.	3110.368
GPSR manufacturer data	Wolfgang WARMBIER Untere Gießwiesen 21 DE-78247 Hilzingen www.warmbier.com
Width	400 mm
Height	600 mm
Sales unit	1 piece
Content unit	1 piece
Colour	rose
Incl. battery	no
Film thickness	0,1 mm
Packaging properties	permanent dissipative
Resealable	no
ESD compliant	yes
