PC cable: DVI - Display Port, 1.8 m for HD PRESTIGE, HD TREND, HD UNO

The PC cable model 108631 from TAGARNO is used to reliably connect digital microscopes to external display devices. With a length of 1.8 m, it offers sufficient flexibility for use at the workplace and enables stable signal transmission between DVI and DisplayPort interfaces.

It is compatible with the TAGARNO HD PRESTIGE, TAGARNO HD TREND and TAGARNO HD UNO models and is ideal for displaying live images on external monitors or displays.

Thanks to its custom-fit design, the cable is a practical addition to existing microscope systems and supports smooth integration into existing working environments.

Item no.	**WL27053**
