Rework tip RxP series slotted 2.34 x 1.37 mm

RxP-Blade/Quad Solder Tip Cartridges are the rework tips for the Metcal MFR-series soldering systems. The second letter in the part number designates the temperature series. RFP-Cartridges are nominally 390 ˚C. Metcal recommends the RFP temperature series for most applications. However, there is a higher temperature range designated RCP, nominally 450 ˚C, for high temperature and thermally demanding applications. Can be used with leaded and lead-free solder. The Metcal SmartHeat®-Technology“ will adjust the power levels during soldering to suit the application.

- suitable for ceramics and applications with high thermal requirements
- suitable for MFR-1100 and MFR-220 series
- Slot size: 2.34 x 1.37 mm
