

**ESD clogs GX 390 black, SB, nubuck leather, ladies,
black/royal blue, size 37**

The SportLine upper is a fabric that consists of textile fibres and combines various advantages. The fabric is particularly air-permeable, breathable and therefore very comfortable to wear. Its hydrophobic properties also make it water-repellent, quick-drying and hard-wearing.

The MPU® Light sole technology offers ultra-light running comfort and optimal cushioning. The ergonomic tread design of the sole provides more grip and supports natural movement. (SRC) The tread arrangement and sole edge design provide stability and even more grip.

The anatomically shaped steel toe cap protects the foot in the toe area against impact of min. 200 joules and a compressive stress of min. 15 kN, according to EN ISO 20345:2012.

Particularly in everyday working life, with high physical stress, temperature-regulating properties are not only required, but expected. The aktiv-X functional lining stands for the

highest quality, innovative technology and offers the wearer permanent, active moisture regulation. The aktiv-X functional lining regulates moisture and ensures that the shoes dry again quickly. It does not stain, is skin-friendly and abrasion-resistant.

Work healthier with the right cushioning. The new 3D cushioning system from ATLAS® enables noticeably gentle and fatigue-free walking. The basis for this outstanding walking comfort is formed by three basic components: Pressure relief. Cushioning. Dynamics. This is ensured by the perfect interaction of a pressure-relieving insole and the light and responsive MPU sole technology.

The ATLAS women's models were specially developed to meet the needs of women's feet and thus offer maximum wearing comfort in your working environment. A high level of wearing comfort and a pleasant soft footbed played a special role in the development. Thus, thanks to anatomical specifications and the latest technologies, a women's model with the highest degree of flexibility, dynamics and comfort could be developed.

- EN ISO 20345 SB SRC
- ESD (leakage resistance <35 Megaohm)
- Standard width W10
