

Footwear electrode for PGT2000

The footwear electrode model 7100.PGT2000.S from Warmbier is designed for use with the PGT2000 system and is used to reliably dissipate electrostatic charges via the footwear. The ESD-compliant design protects both operators and sensitive electronic components from uncontrolled discharges.

The electrode has a robust design and is suitable for permanent use in production, laboratory or assembly environments where a safe earthing path is required for personnel. It thus supports compliance with ESD protection guidelines and ensures safe, trouble-free operation of electrostatically sensitive work areas.

Item no.	WL28580
Model	7100.PGT2000.S
Manufacturer	WARMBIER

Manufacturer article no.	7100.PGT2000.S
GPSR manufacturer data	Wolfgang WARMBIER Untere Gießwiesen 21 DE-78247 Hilzingen www.warmbier.com
Sales unit	1 piece
Content unit	1 piece
Incl. battery	no
ESD compliant	yes
