

## Solder paste mixer, max. capacity 680 g

- Centrifugal mixer that mixes, distributes and deaerates the solder in a few minutes. The integrated container rotates inside the unit like the earth rotates around the sun and also around its own axis.
- can prepare/mix cold stored solder paste without bringing it to room temperature
- removes large air bubbles in the paste, which can be the cause of solder paste defects
- for 500 g solder paste container
- maximum capacity: 680 g (total mass to be mounted on the support, including materials, containers and adapters)
- Standard container: 150 ml
- voltage: 230 V

item number

WL29092

model

SR-500 Thinky
