

WXHP-120 Preheating plate 120 W for assembled PCBs

The WXHP-120 preheating plate from Weller offers an output of 120 W and is specially designed for preheating assembled PCBs. It is compatible with the WTCP-51 and WS-51 soldering stations. This preheating plate enables even heat distribution, which efficiently supports the soldering process and improves the quality of the soldered connections. The precise temperature control minimizes the risk of thermal damage to sensitive components. The WXHP-120 is a reliable solution for demanding soldering applications in electronics production.

- Heated area 80 x 50 mm / 3.15 x 1.97 inch
- Platinum Sensor
- Internal parameter memory (zero tolerance)

item number

WL29097

model

WXHP-120

Products for the electronic industry

manufacturer	WELLER
manufacturer item number	T0052702999N
GPSR manufacturer information	WELLER Tools GmbH Carl-Benz-Strasse 2 DE-74354 Besigheim www.weller.eu
order unit	1 piece
content unit	1 piece
power	120 W
voltage	24 V
temperature range °C	50 – 200 °C
temperature range °F	120 – 400 °F
suitable control unit	WX 1, WX 2, WXD 2, WXA 2, WXR 3
