

1-channel supply unit - digital, modular

The JBC DI-2D 1-tool supply unit - digital is a state-of-the-art digital supply unit from JBC. With a connection for an electric/compressed air-driven vacuum pump or N² control unit, it offers maximum flexibility. Over 20 parameters can be individually stored for the soldering process, enabling precise and efficient operation. This supply unit has a modular design and is therefore adaptable to different requirements in electronics production.

- Connection for electrically / compressed air operated vacuum pump or N² control unit
- more than 20 parameters can be stored for the soldering process

item number	WL30351
model	DI-2D
manufacturer	JBC
manufacturer item number	DI-2D
length	180 mm

Products for the electronic industry

width	90 mm
height	105 mm
length with packaging	220 mm
width with packaging	213 mm
height with packaging	160 mm
scope of supply	1 DI-2D control unit
order unit	1 piece
content unit	1 piece
fuse	1 A
voltage	230 V
temperature range °C	90 – 450 °C
output power supply unit	130W / 23,5V
communication connectors	USB interface station-PC
Tip to ground resistance	<2 ohms
ambient operating temperature	10 – 40 °C
number of channels	1
