

Solder fume extractor, FT 12

- Capacity 6 bar
- Up to 2 FE soldering irons can be connected
- Maintenance-free compressed air converter
- Suitable for industrial continuous operation
- A compressed air cleaning filter additionally removes odours caused by compressed air.
- Portable device for central use
- The FT 12 solder fume extraction unit requires clean and oil-free compressed air. The negative pressure is generated by a maintenance-free compressed air converter. The polluted air is cleaned by a pre-filter and a main filter system. A compressed air cleaning filter additionally removes odours caused by compressed air. This highly efficient filter system makes the FT 12 extraction unit a real air recirculation system. The FE soldering irons (Fume Extraction) are connected directly to the device, no further line accessories are required.

item number	WL30876
model	FT-12
manufacturer	WELLER
manufacturer item number	112-0000-ESDN
length	120 mm
width	120 mm
height	200 mm
order unit	1 piece
content unit	1 piece
vacuum max	20000 Pa
noise level	37 dBA
air volume	27 l/min
