

ESD Internal connection cable

The power cable is an essential connection cable for electrical connection strips and 19" superstructures. With a 3-pin WINSTA snap-in socket, which has internal wiring after the main switching module, it ensures a safe and efficient power supply. This high-quality construction makes the power cable ideal for professional applications where reliability and precise connections are crucial.

- Connection cable for electrical connection strips and 19" superstructures
- 3-pole WINSTA snap-in socket incl. internal wiring after the main switching module

Item no.	WL31359
Model	95.645.98
Model line	others
Manufacturer	KARL
Manufacturer article no.	95.645.98
GPSR manufacturer data	Andreas KARL GmbH & Co. KG Hauptstraße 26 DE-85777 Fahrenzhausen www.karl.eu
Sales unit	1 piece
Content unit	1 piece
ESD compliant	yes
