

Mini Ionizer FUSION

With an ionization device from SIMCO, electrostatic charges can be neutralized at workplaces and in the ESD service area. The integrated blower is infinitely adjustable. In the ionizing unit, the ionization is based on high-frequency alternating voltage (HF-AC).

- for installation in machines
- Mini ionizer with minimum space requirement, allows very close mounting to the object to be neutralized
- Neutralization of electrostatic charges, e.g. in pick-and-place machines, wave soldering, etc.
- Integrated control, high voltage is generated in the device
- Self Balancing
- Steady State DC" operating mode
- Up to 4 devices can be connected to each other
- Optionally retrofittable with blower
- Emitter tips: tungsten
- Dimensions: 7,5 cm x 4,8 cm x 8,9 cm
- Note: The device is delivered without power supply unit.
- Power supply 7500.FU.T must be ordered separately.

- Additional blower attachment is available at 7500.FU.F.

item number	WL32149
model	7500.FU
manufacturer	SIMCO
manufacturer item number	7500.FU
width	75 mm
height	48 mm
depth	89 mm
order unit	1 piece
content unit	1 piece
supply voltage	230 V
ionic balance	self-balancing
ESD safe	yes
