

## MD 210 Stainless steel lid

A suitable stainless steel lid for an ultrasonic bath protects the bath liquid from external contamination and prevents odour nuisance caused by the added cleaning or disinfecting preparations. In addition, the noise emission during operation of the ultrasonic bath, which may be perceived as disturbing, is reduced. The lid is designed in such a way that any condensation water that arises is led back into the tank.

- suitable for RM210UH / RM212UH / ZM212UHL
- Stainless steel
